UBSplus[®] "Lite"

About UBSplus[®] "Lite"

The UBSplus[®] "Lite" Utility Billing System was created specifically for the Utility with 1,000 service addresses or less. Utility Data Systems, Inc. recognizes that even though a utility is small, the need for a robust billing software is the same as that of a larger utility. UBSplus[®] "Lite" is our response to the need small utilities have for affordable yet feature-rich utility billing software written by people who came from the utility industry.

"So, What Do I Get?"

With UBSplus[®] "Lite" you get all the customer care, billing, payment, adjustment, and reporting functions currently found in the FULL version of UBSplus[®]. When you purchase UBSplus[®] "Lite", you will receive the UBSplus[®] Training Tutorial, Tutorial Manual, and Training Presentation. Utility Data Systems, Inc. provides eight hours of online training that you can schedule in one-hour increments at your convenience.

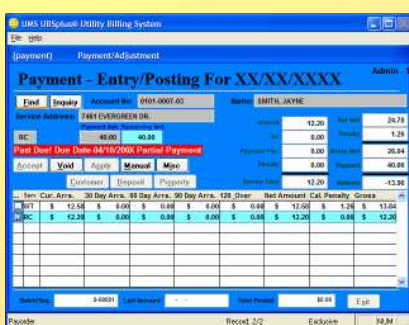

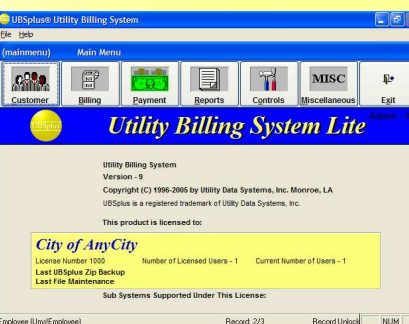

"Then What's The Difference?"

The following limitations have been placed on UBSplus[®] "Lite":

- Licensed for use on one computer only (no network capabilities)
- 1,000 service addresses maximum
- Only compatible with MREplus[™] Software for Handheld Meter Reading Devices (no support for third-party handheld meter reading device files)

"So, What's The Cost?"
