UBSplus® "Lite"

About UBSplus® "Lite"

The **UBSplus® "Lite"** Utility Billing System was created specifically for the Utility with 1,000 service addresses or less. Utility Data Systems, Inc. recognizes that even though a utility is small, the need for a robust billing software is the same as that of a larger utility. **UBSplus® "Lite"** is our response to the need small utilities have for affordable yet feature-rich utility billing software written by people who came from the utility industry.

"So, What Do I Get?"

With **UBSplus® "Lite"** you get all the customer care, billing, payment, adjustment, and reporting functions currently found in the **FULL** version of **UBSplus®**. When you purchase **UBSplus® "Lite"**, you will receive the **UBSplus®** Training Tutorial, Tutorial Manual, and Training Presentation. Utility Data Systems, Inc. provides eight hours of online training that you can schedule in one-hour increments at your convenience.

"Then What's The Difference?"

The following limitations have been placed on **UBSplus® "Lite"**:

- Licensed for use on one computer only (no network capabilities)
- 1,000 service addresses maximum
- Only compatible with **MREplus™** for Mobile Computer Meter Reading Devices (no support for third-party handheld meter reading device files)

"So, What's The Cost?"
